General Guidelines for Designing Accessible Courses

The following suggestions are appropriate instructional strategies for all students and are especially effective in assuring access for students with disabilities:

▪ Provide students with a detailed course syllabus that clearly addresses expectations at the beginning of the semester.

▪ Announce reading assignments well in advance; students may need time to have their reading materials converted to alternative formats or to complete reading assignments.

▪ Start each class period with an outline of material to be covered that day and briefly summarize key points at the end of the lecture.

▪ Speak directly to students, using gestures and natural expressions to enhance understanding.

▪ Present new vocabulary and give course assignments in a variety of ways: in lecture, through examples, on the blackboard, on handouts, at Websites, etc.

▪ Create a course Website and use it to post daily notes of the lecture and assignments.

▪ Allow students to tape record your lectures.

▪ Provide opportunities for questions and answers and schedule review sessions.

▪ Discuss the format of your tests with the class and, if possible, provide a sample test or copies of exams you have used previously.

▪ Provide copies of overheads and/or PowerPoint slides.

▪ When in doubt about how to assist the student, ask him or her.
